Java

C++

C

Python

JavaScript

Assembly

ROS

Docker

GO

Swedish

English

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

Education

2020- -	Master in computer science at LIU
	Master profile: Autonomous Systems / AI.
	Graduating: 2025
2019-2020	Electrical mechanic at Försvarsmakten/Swedish armed forces
	Part of standard military service

Experience

6/2023-8/2023	Internship at Ericsson
	Data extraction and visualisation on Ericsson's software catalogue.
6/2022-8/2022	Internship at Qualcomm
	In a team of three, built the framework of a model car (software and hardware). Intended to be used by students doing master thesis.
9/2022-8/2023	Board Member at FIA Robotics
	Part of the board in FIA Robotics, primarily working with company contact.
9/2020-5/2021	DLAN - LIU
	Responsible for electricity in a project group organizing LAN events.

Projects

8/2023- -	Project SeeGoals at FIA robotics
	Part of a team competing in SSL Robocup. Preparing for Eindhoven 2024
	Skills: GO, JavaScript, Hardware
2023- -	Personal project Github
	Website built in React to solidify my skills
	Skills: React, JavaScript, AWS
8/2022-8/2023	Project @home at FIA robotics
	Part of the project @home competing in service robotics. Competed in Bordeaux, France 2023
	Skills: Python, Docker, ROS, C++
10/2021-3/2023	Project Firefighter at FIA robotics
	Part of project Firefighter, building a robot for competition.
	Skills: C++, Hardware
2020	Tower defense, coursework Github
	Built a tower defense game in Java. Grade 5
	Skills: Java
